RECYCLE
token

GO GREEN
SAVE OUR PLANET

INTRODUCTION TO RECYCLE TOKEN

The Recycle Token system is a world first – providing people with an incentive to recycle waste. This solution leverages a blockchain based mobile app, and designated collection points, to allow the exchange of recyclable waste for RCYL tokens. The tokens can then be exchanged for other cryptocurrencies.

RECYCLE MORE, SAVE MORE

Introducing First Tokenization To Recycle

Recycle to make you feel good, and get incentivized doing it. Imagine doing good and getting tokens for it.

KEY TAKEAWAYS

Introducing First Tokenization To Recycle

Recycle to make you feel good, and get incentivized doing it. Imagine doing good and getting tokens for it.

We Are Builders Of Future

“At its core, the issue of a clean environment is a matter of public health.” – Gina McCarthy.

Smart Token For Smart People.

Redefine your relationship with nature, incentivize your carbon footprint, take control of your costs.

WHY BINANCE SMART CHAIN (BSC)?

The Binance Smart Chain (BSC) offers the community interoperability. Additional benefit of giving RCYL tokens on the BSC is that it offers modest exchange fees contrasted with the Ethereum Network.

Low transaction fees:

The transaction fees in ethereum hit record highs, where BSC gas fees are 20 times lower than ethereum, and its transaction fees reach as low as 1 cent, which is considered a high advantage for users.

EVM Compatible:

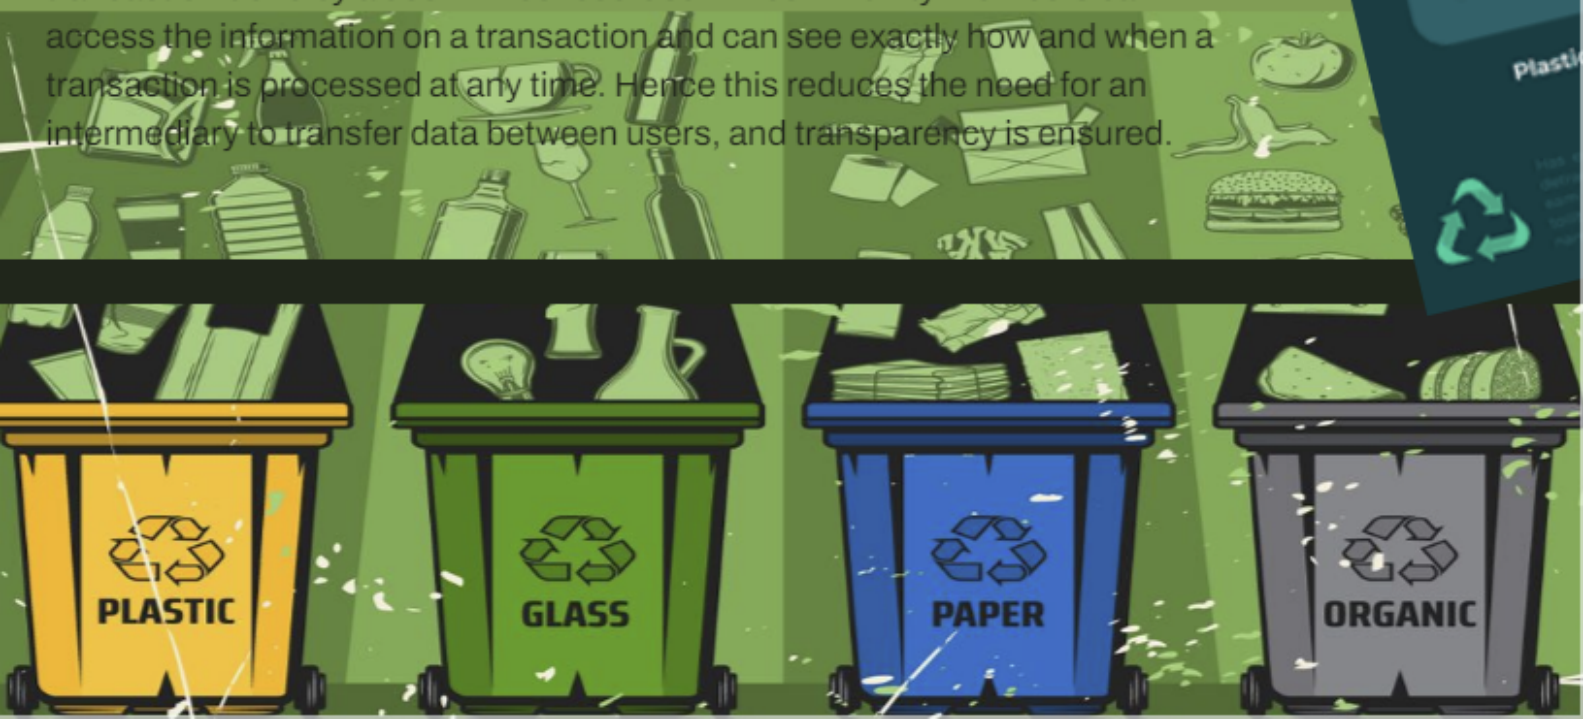

Advantage is that BSC is EVM compatible, supporting Metamask, one of the most popular Defi Wallets.

High Speed:

BSC utilizes Proof of staked Authority consensus (PoSA), where a new block is produced every 3 seconds, a high-speed infrastructure required in Defi apps.

Transparency:

The decentralized structure is the most popular feature in Blockchain. Any transaction done by a user will be recorded. All community members can access the information on a transaction and can see exactly how and when a transaction is processed at any time. Hence this reduces the need for an intermediary to transfer data between users, and transparency is ensured.

TOKEN Economics

The math and incentives governing RECYCLE Token - RCYL. It is about the mechanics of how the token works, as well as the psychological or behavioral forces that could affect its value long term.

HOW?

PROCESS

1. Download and register

Download our app on PlayStore or Apple App Store .

2. Order or Pick QR printed Bags

Order bags from app to be scanned using your phones.

3. When bag is full, drop and scan

When bags are full, Scan bag, and drop site QR codes.

4. Be happy, and Inspire Others

Feel sense of joy, feel life, teach others and inspire the future.

5. Get Tokens

Get tokens deposited into your account and check balances on the app.

6. To The Moon

Spread the word, save the world, and aim for the moon by going green.

PROSPECTS

The value of RCYL in the future is predicted differently depending on who makes the prediction. It might hit high point per coin in 2022, according to our

estimates. The token might reach 100x by 2023, according to peoples inclination on recycling and going everything green.
